

Partyfield Sound Policy

Since starting Partyfield in 2010 we have battled constantly to provide a sound system that delivers good quality and a decent level of sound to keep our clients happy, and yet at the same time is not too bass heavy, which would travel for miles and upset our neighbours. It has been an exceptionally challenging scenario, and in trying to find the perfect balance we have had a few hiccups, but we are now confident we have the correct system in place to keep everyone happy.

We use a funktion one full range system provided by Audiofeed, which is limited to 92 db. This works well in the marquee and provides enough range for most DJ's and dance music lovers. Friday's we are licensed to have amplified music playing from 12pm until 12am and Saturdays 12pm until 1am. If you want to carry the party on after the main system has been turned off we recommend you go for the late night chill out tent. It has a block rocker iPod dock, and is set up in a smaller marquee in a bunker in the woods. This option is great if you have children and guests at your event which won't be awake too late and won't want to be kept up all night. Live bands can play from 12pm until 7pm on Friday and Saturday. We insist on these times for bands because they generate considerably more noise than DJ's etc. If you are having bands you will require a sound engineer for the time the bands are playing (This is a condition of us allowing bands and will improve the experience for you and your guests, please see our contacts page for sound engineers).

Our system specification is listed in the prices section and includes 24hr assistance from the team at

Audiofeed. The band package includes desk and in ear monitors and everything you will need, except lighting. Please book the band package through us as it includes compatible high end equipment and again back up from a local reliable supplier and you will have peace of mind everything will be there for you.

1. If you have live music being played by bands at your event you will need to discuss the following with them. We do not allow anyone to use additional equipment on our site and insist that all bands play through the equipment we provide. Please ensure any artists are aware of this.

2. Our steward will monitor the site with a Db meter when live acts are playing, please respect their decision's.

Our marquee has been lined with an acoustic barrier, we have realised that having the sides closed at night helps considerably with containing the music. In the day time we allow the side of the marquee to be opened which allows everyone to sit outside to watch and feel connected to the bands and dj's, and depending on the night and the levels etc the stewards will at some point reinstate the sides of the marquee, this not only contains the sound it also forces people into the marquee which is good to get everyone in and dancing and the atmosphere of your event.

Everything above is from years of doing events at Partyfield and trying to give you the best possible experience, we do have regular events and it is imperative to keep everyone happy and not to jeopardise our business. We have had numerous amazing parties and festivals, and employing our

policies ensures the future of Partyfield for everyone.
Your cooperation and respect is appreciated.
